DESIGNING FOR DAYLIGHT

ENGINEERED TO
EXCELLENCE

Welcome to...

6 Decades of Engineering Excellence.

Headquartered at our founding site, we have grown from humble beginnings into a global leader. Today, over 1,000 professionals support a wide variety of industries across the globe.

Our extensive product portfolio includes a wide range of premium plastic sheets, expertly engineered skylight systems, and bespoke envelope options. Products are designed and manufactured to meet the highest standards, catering to the diverse needs of our customers across multiple sectors and industries. Whether it's a complex architectural project, a huge industrial warehouse development or a simple canopy covering, we have the experience and expertise to deliver it all.

A sustained commitment to continuous investment in advanced manufacturing technologies, innovation, and new product development ensures that Brett Martin remains at the forefront of daylight solutions. Our reputation has been built over decades of delivering tailored, high-performance solutions to many of the world's leading brands - an achievement made possible through our unwavering dedication to engineering excellence, strong customer partnerships, and long-term product quality and performance.

Our Story

Committed to the Middle East

As one of the industry's leading innovators in daylighting and engineered roofing solutions, Brett Martin has built a strong and strategic presence in the Middle East for over a decade.

Our commitment to the region is anchored by the establishment of Brett Martin DWC LLC, our centrally located UAW hub designed to efficiently serve the entire GCC market with dedicated commercial, technical, and customer support functions.

Through the expertise of our regional team, Brett Martin has forged high value partnerships with globally recognised contractors, consultants, and supply chain leaders. These collaborations have been instrumental in delivering cutting edge daylight systems, precision engineered rooflight solutions, and high performance building materials tailored to the unique demands of Middle Eastern construction environments.

Our Sustainable Future

At Brett Martin we are committed to a lower carbon future.

We are at the forefront of the drive to reduce embodied carbon through efficient manufacturing and the lowering of operational carbon in buildings through the design of energy saving roofing products.

Our policy to Reduce, Reuse, and Recycle is lessening our impact on the environment with innovative investments in renewable energy, recycled resources and bio-based materials, across our business.

By continually reducing our own environmental footprint, we help customers do the same. For developers, architects and contractors, we provide responsibly manufactured, high-performance solutions that support more sustainable projects and meaningful carbon reduction.

Brett Martin HQ
Mallusk, Co. Antrim

Our membership of Planet Mark's Net Zero Programme represents the way we measure and reduce our carbon use as we work to build a sustainable brighter future for us and our planet.

Our dedicated 6.42 MWp solar farm provides clean energy and saves 900 tonnes of CO₂ each year.

Our 2.3MWp wind turbine towers 99.5m above our site and saves 832 tonnes of CO₂ each year.

Our Marlon BioPlus Clickfix Façade system is manufactured from a remarkable material with an 89% carbon reduction and is produced with 100% renewable energy.

Our Divisions

Daylight Systems

Brett Martin is proudly recognised as the UK and Ireland's leading skylight manufacturer, with more than 65 years of specialist expertise in the design and production of advanced daylighting solutions. Over this time, we have developed one of the industry's most comprehensive portfolios of high-performance systems, including site-assembled and factory-assembled skylights, domes, vaults, and precision-engineered panel glazing systems suitable for an extensive range of commercial, industrial and architectural applications.

Every skylight is manufactured with exceptional attention to detail. Our solutions are precision engineered in purpose

built UK facilities operating and certified to rigorous ISO 9001, 14001 and 45001 standards. These accreditations reflect our unwavering commitment to quality assurance, environmental responsibility, and manufacturing excellence.

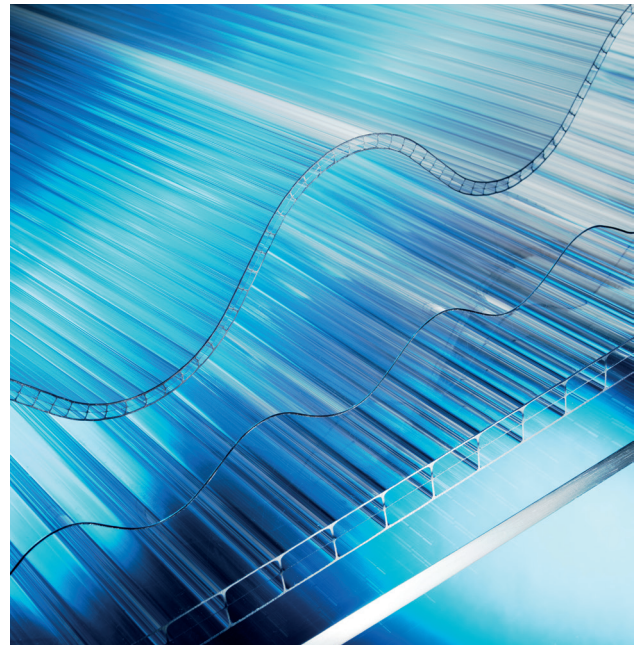

Through continual investment in innovation and technology, we deliver daylighting systems that combine outstanding performance, durability, and energy efficiency - helping clients achieve superior natural light transmission, optimised thermal performance, and long-term value across every type of project.

Plastic Sheets

With over 30 years of specialised expertise in the semi-finished thermoplastic sheet industry, Brett Martin has established a world-class reputation for delivering high-performance material solutions trusted across global markets. Our extensive product range spans Polycarbonate, PVC, Foam PVC, PET, Acrylic, and GRP, providing exceptional versatility for a wide spectrum of applications.

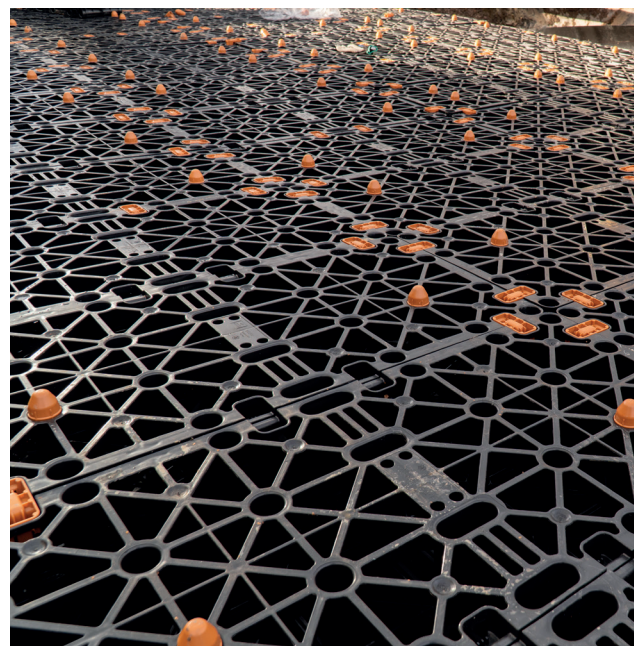

Brett Martin plastic sheet solutions are utilised across diverse sectors including sky lighting, architectural glazing, fabrication, printing, signage, and display, where reliability, consistency, and long-term performance are essential.

Plumbing & Drainage

As the UK and Ireland's largest manufacturer of plumbing and drainage products, Brett Martin offers a comprehensive range of underground, rainwater, and plumbing systems, including the premium Cascade cast-iron style range, all produced to BS EN ISO 9001 and the latest industry standards.

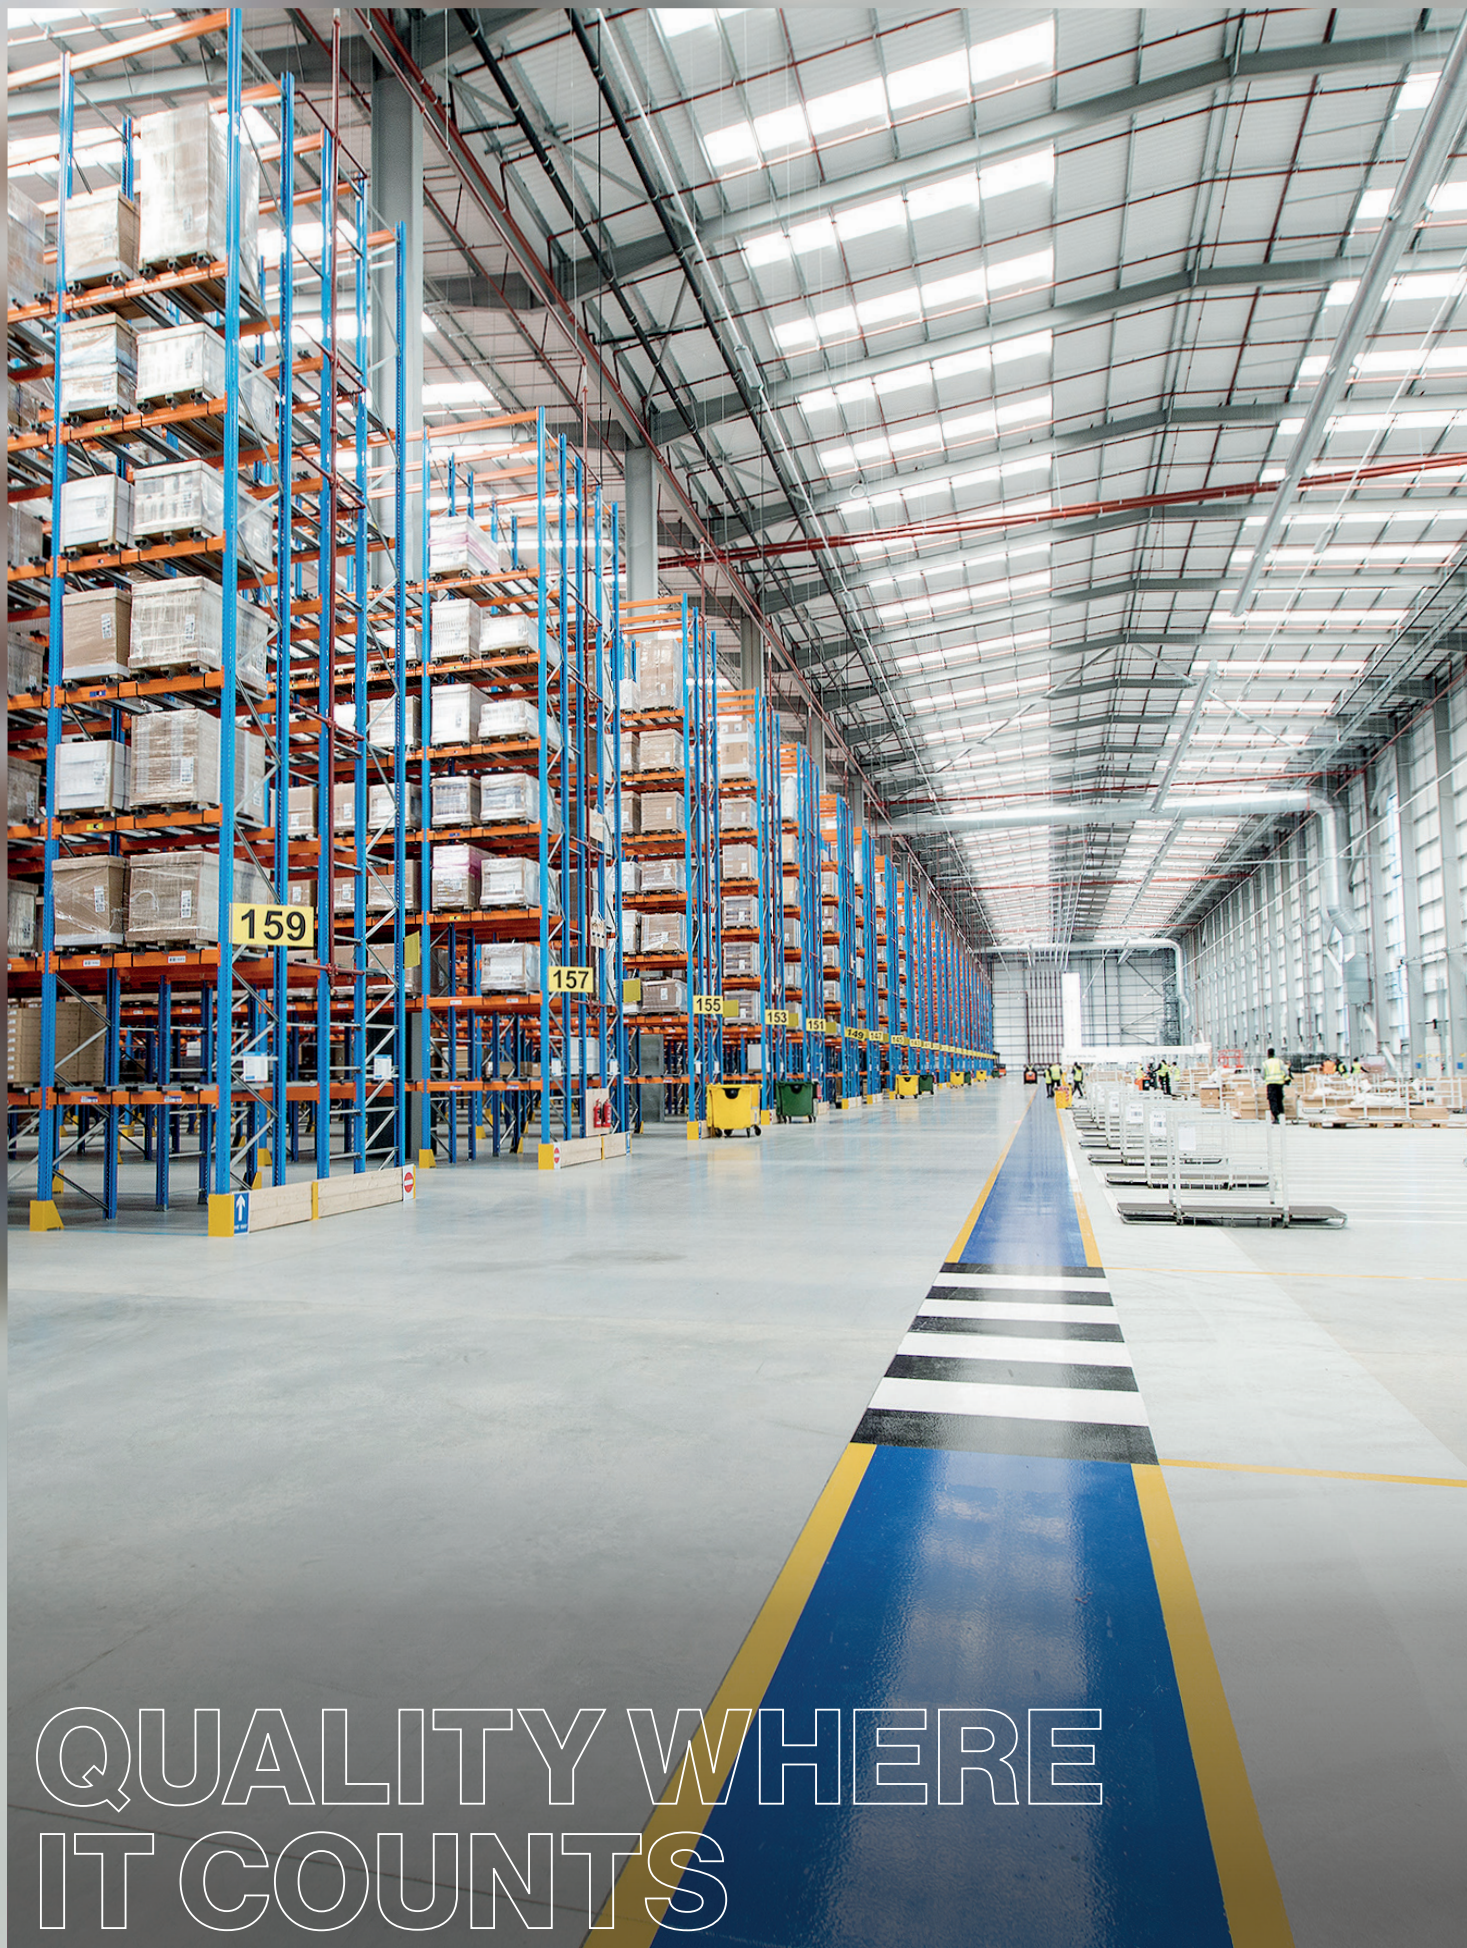

We ensure reliable supply, expert support, and consistently high service levels for every customer.

Certifications

Our extensive product range is manufactured in the UK at Brett Martin's EN ISO 9001, 14001 and 45001 certified facilities, and various products in our range hold specific certifications, examples of which are shown below. In addition, we are proud members of various trade associations, including the UK's Rooflight Association (RA), and the association of European Polycarbonate Sheet Extruders (EPSE), demonstrating our commitment to quality, compliance and best practice.

QUALITY WHERE
IT COUNTS

Our Services

Product Selection

At Brett Martin DWC LLC, we carefully guide you through the selection process so that we meet your project requirements.

Technical Support

Our solutions driven team of experts will help resolve your technical requirements whilst adhering to the project objectives.

Our Projects

For over a decade, Brett Martin has been a trusted partner in the Middle East, supplying high-performance products and delivering exceptional service across more than 100 projects.

Our extensive experience in the region spans a diverse array of industries, including retail, commercial spaces, educational facilities, healthcare institutions, military operations, aircraft services and more.

Each of these sectors has benefited from our expertise in providing advanced daylighting solutions that not only enhance the aesthetic appeal of buildings but also significantly improve energy efficiency and sustainability.

The success of these projects is a testament to our unwavering commitment to quality, innovation, and customer satisfaction. By working closely with architects, contractors, and developers, we ensure that each solution is customised to meet the unique needs of every project, no matter the scale or complexity.

Brett Martin's reputation for excellence in the Middle East continues to grow, as we remain dedicated to delivering impactful solutions that stand the test of time and add lasting value to the region's most iconic developments.
