

Rooflights and Profiled Sheets

How to Reduce Expense and Risk

This CPD is an introduction to the factors that influence expense and risk so that a rooflight or profiled sheeting refurbishment can be carried out both safely and efficiently.

It is suitable for property developers, specifiers, architects and contractors working on all non-domestic building projects.

Topics covered include:

- Brett Martin Group
- Sustainability Credentials
- Industry Partnerships
- Product Gallery; rooflight and material options
- Building Regulations; fragility, fire, insulation and solar gain
- Value Engineering Options
- Case Studies
