

The Brett Martin Academy

**Polymer
Apprenticeship
Programme**

Kickstart Your Career in Polymer Processing With Brett Martin's Apprenticeship Programme!

Why Choose Us?

Expertise

Benefit from our rich legacy of plastic manufacturing, catering to diverse industries worldwide.

Recognised Qualifications

Earn a **Pearson BTEC Level 3 Certificate** in Advanced Manufacturing Engineering and a **PAAVQ-SET Level 3 Certificate** in Polymer Operations upon successful completion.

Hands-On Learning

Gain practical skills and knowledge essential for success in the polymer processing industry.

Comprehensive Curriculum

From basic polymer technology to advanced process engineering, master every aspect under expert guidance.

Course Highlights:

1. Health & Safety in the Engineering Workplace
2. Communications for Engineering Technicians
3. Mathematics for Engineering Technicians
4. Basic Polymer Technology
5. Plastics Materials & Processing
6. Polymer Process Engineering
7. Composite Materials & Processing

Career Opportunities:

Unlock doors to a rewarding career in polymer processing, specialising in injection moulding, blow moulding, extrusion (Manufacturing, Maintenance, Quality, Process Engineering, R&D, Technical).

Flexible Learning:

Balance your education and work commitments with 1 day/week at college and 4 days/week with us here in Mallusk.

Hours of work:

Full time – 4 days at Brett Martin,
1 day in college in SERC Lisburn

What do I need to apply:

5 GCSE grade A-C or equivalent
(*predictive grades if applying prior to getting your results*)

Are you ready to dive into the dynamic world of polymer processing?

Brett Martin, with over 60 years of expertise, invites passionate individuals to embark on a journey towards excellence in manufacturing engineering.

To apply send your CV to carolinebeck@brettmartin.com or email Caroline for further details and a site tour.
