Daylight Systems

Your One Stop Sealant Shop

At Brett Martin Daylight Systems we are proud to be considered the UK's largest, most innovative rooflight company and widely recognised as industry specialists in the design and manufacture of superbly engineered rooflights and rooflight systems.

With a reputation borne from 60 years' experience in the design and development of rooflights, we have combined our extensive roofing industry experience with established and proven supply partnerships to offer you a comprehensive range of tried, tested and trusted Roof Sealants comprising Fillers, Tapes and Sealants.

Now all your preferred Roof Sealants are available from Brett Martin Daylight Systems and everything you need for the sealing and bonding of roofing, cladding and glazing can be ordered from our dedicated Sealant Shop.

Why choose Brett Martin Roof Sealants?

Tried and Trusted Products
Brett Martin’s Roof Sealants comprise a comprehensive range of high demand Fillers, Tapes and Sealants, carefully selected to satisfy the requirements of the roofing and cladding industry. Offering premium performance, durability and safety, our Roof Sealants are fully endorsed by us and our supply partners to deliver top quality results for the nation’s roofing and cladding industry professionals.

Made in the UK
Manufactured in Brett Martin’s own ISO 9001 and 14001 accredited factory in Coventry, our Fillers are renowned for the highest standards in profile accuracy, design and quality. Our precision cutting machinery produces fillers to exceptionally high levels of accuracy, optimising seals and minimising energy loss. With a choice of material options and using our profile identification tool we can match every roofing and cladding profile to satisfy any air, acoustic or fire sealing requirement.

Big Brand Confidence
Our Tapes and Sealants have been hand-picked from industry leading manufacturers to ensure our customers receive quality products which promise optimum performance every time. Featuring big brands such as Soudal, Hodgson Sealants, Dow Corning, HS Butyl and 3M you will be assured that whatever product you select from the Brett Martin Roof Sealants range, it has been innovated by specialists in their field.

Competitive Prices
Long standing supply partnerships coupled with our collective buying power ensures that you continue to receive top quality Roof Sealant products at the right price.

Speedy Delivery
At Brett Martin we understand industry time pressures and the need to deliver your products to you as quickly as possible. With our quick turnaround we will pick, pack and ship your order from our in-house stock for delivery to you whenever you need it.

Service and Support
Our dedicated Roof Sealants customer support team will assist you every step of the way from product selection, to order placement, delivery and after sales support. For more in-depth project support, our expert technical advisors are on hand to deal with more complex product enquiries and advice.

Fillers

With the most extensive profile identification guide in the world, we can manufacture a filler to your bespoke requirements. A solution that will exhibit the highest standards of accuracy, design and quality.

Types of Filler

- Polyethylene
- Supaseal
- VHTM
- Firestop
Profiles

Virtually every roofing and cladding profile is held on our database and others can be quickly added. A direct reference to tooling ensures that fillers are always precision matched to sheeting panels. Sheet manufacturer name or reference can identify the correct profile or profile drawings can accurately match dimensions.

Flute

The choice of flute depends on which side of the profiled sheet is to be filled. See Fig 1.

Large

Typically used at the ridge, filling the inter-profile between ridge cap and corrugated roof sheet, this filler fits on top of the sheet. For a reverse profile the large flute filler goes under the sheet.

Small

Typically used under the roof sheet at the eaves, filling the inter-profile cavity between sheet and structure, the small flute is fitted to the opposite side of the sheet compared to the large flute and fits upwards into the crown.

Self Adhesive Fillers

Bonded butyl sealants can be applied to the profile, the base or both, offering easier location and improved weather seal.

Base

Large and small flute fillers are manufactured with a standard 6mm base. Extended base depth available on request. Please see Fig 2.

Filler Angle

Fillers to be fitted along roof hips and valleys must be cut to the angle formed by the flashing or valley and short dimension of the profiled sheet *(true angle). It must also be determined if the filler is left or right handed. Please refer to the plan drawing Fig 3 “Handing, flute size and angle cut.”

*This depends on both the plan angle and pitch of the roof; we can calculate this if required.

Ventilated Fillers

Trimmed Profile - Small Flute

Allows condensation forming on the under side of the sheet to run down over the top of the filler.

Ventilation Channels - Large Flute

V shaped nicks in the foam allow condensation forming on the ridge flashing to run down over the top of the filler.

Mesh Inserts - Large & Small Flutes

19mm mesh vents situated in the body of the flute prevent insects entering the void. Please see Fig 4.

Ferrule Vents - Large & Small Flutes

22mm ferrule vents situated in the body of the flute allow airflow.

Fire Stop Fillers

Made to order FIRE STOP C144 is designed to be fitted above compartment walls and into corrugations where complete resistance to fire is required.
### Supaseal

**Key features**
- Closed cell, cross-linked, blend of flexible polymers.
- Unique to Brett Martin.
- Density 30kg/m³.
- Service temperature -45°C - +70°C.
- Excellent gap filler at low compressive forces.
- 25 year warranty.
- Made to measure.
- Options: self-adhesive, extended base, venting.
- Range of thicknesses (25mm,50mm).
- Range of colours (black, white).
- Can be supplied as strips/angle cut on request.

**Applications**
- Sealing eaves & ridge.
- Sealing hips, valleys & gable walls.
- Sealing rooflights.
- Essential when airseal or warranty requires.

### Polyethylene

**Key features**
- Closed cell, cross-linked PE foam.
- Density 30kg/m³.
- Service temperature -70°C - +70°C.
- Made to measure.
- Options: self-adhesive, extended base, venting.
- Range of thicknesses (25mm,30mm, 50mm).
- Range of colours (black, white, liquorice).
- Can be supplied as strips/angle cut on request.

**Applications**
- Sealing eaves & ridge.
- Sealing hips, valleys & gable walls.
- Sealing rooflights.
- Essential when airseal or warranty requires.

### VHTM

**Key features**
- Very high temperature material.
- Density 30kg/m³.
- Service temperature -60°C - +105°C.
- Made to measure.
- Options: self-adhesive, extended base, venting.
- Range of colours (black, white).
- Can be supplied as strips/angle cut on request.

**Applications**
- Sealing eaves & ridge.
- Sealing hips, valleys & gable walls.
- Sealing rooflights.
- Essential when airseal or warranty requires.

### Firestop Block
Mineral wool which is essential when a fire rating is specified.

- Key features
  - Mineral wool.
  - C144 fire stop strips.
  - Provide from 1-6 hours fire protection.
  - Essential when fire rating is specified.
  - Made to measure.
  - Simple to install.
  - Airtight & smoke seal when coated.
  - Can be shrink wrapped to prevent fibre migration.
  - Maintenance free.

- Applications
  - Fire or acoustic seal to decking, cladding & roofing.
  - Sealing partition heads and top flanges of fire boarded structural steel.
  - Providing acoustic performance.

### Firestop Strip
Provide firestopping for vertical and horizontal construction joints and at the interface between compartment walls and soffits.

- Key features
  - Mineral wool.
  - Manufactured to suit cavity size, width of wall and required fire protection level.
  - Simple installation.
  - Provide from 1-6 hours fire protection.
  - Airtight and smoke seal when used in conjunction with Fastight Paint.
  - Available shrink wrapped to prevent fibre migration.
  - Good acoustic performance when coated with Fastight Paint.
  - Unaffected by humidity and moisture.
  - Maintenance free.

- Applications
  - Provide firestopping for vertical and horizontal construction joints.
  - Provide firestopping at the interface between compartment walls and soffit.

We offer an extensive range of multipurpose tapes that are perfect for your everyday tasks and specialised project work. Available in a wide range of brands, sizes and colours, you can easily find a tape to meet your requirements.

Types of Tapes

- Butyl Mastic
- Moisture Tape
- Butyl Backed Foil Tape
- Membrane Tape
- EPDM Tape
- Expanding Foam Tape
- PVC Foam Tape
- PE Foam Tape
- Acrylic Foam Tape
- VHB Tape
- Glazing Tape
- Jointing Tape
- Utility Tape
- Foil Tape
- Specialist Tape
- Ancillary Product
Butyl Strip Sealants

Butyl strip sealants are a blend of synthetic rubber plasticisers, fillers and resins extruded in various sizes. They are usually fitted within a lap, using compression of the sealant to achieve a good seal. Butyl sealants are generally extruded as rectangular/round beads with varying dimensions. Round, square and U sections fill bigger gaps and compress more easily, conforming to gaps of varying thickness. Higher performance Class A variants (as defined in NFRC Technical Bulletin 36), renowned for ease of application and long life, are recommended for extended life and for particularly demanding joints.

Detail guidance on use of butyl strip sealants is given in MCRMA Technical paper No. 16 “Guidance for effective sealing of end lap details in metal roofing constructions”, which includes the following recommendations.

**Built-up systems**

- **Profiled metal to metal combinations**
  - A single run of 6x5mm or 6mm bead sealant positioned 15mm from each end of the lap (see MCRMA TP 16 Fig 3).

- **Profiled metal to GRP rooflight combinations**
  - Two lines of sealant
  - A single run of 6x5mm or 6mm bead sealant positioned approximately 10-15mm either side of the primary fixing* (see MCRMA TP 16 Figs 6,7,8)

**Composite systems**

- **Composite panel to panel combinations**
  - Three lines of sealant (asymmetric primary fixing position)
  - A single run of 6x5mm or 6mm bead sealant positioned approximately 10-15mm either side of the primary fixing with a third seal positioned 15mm from the bottom of the lap (see MCRMA TP 16 Fig 4).

- **Composite panel to factory assembled GRP rooflight combinations**
  - Two lines of sealant (asymmetric primary fixing position)
  - A single run of 6x5mm or 6mm bead sealant positioned approximately 10-15mm either side of the primary fixing* (see MCRMA TP 16 Figs 9,10).

*Where a seal is required at the bottom of the lap to keep out dirt and trapped water a bead of premium quality neutral cure silicone sealant positioned approximately 15mm from the bottom of the lap is suggested. The silicone sealant should ideally conform to classification ISO 11600 - F - 25 LM or BS EN ISO 11600: 2003 and adhesion to the substrates involved verified.
Film backed butyl sealants are developed especially for sealing laps in liner panels on site assembled metal walls and roofs to reduce condensation and increase air-tightness in buildings.

Polyband is a simple answer to creating an efficient and durable vapour barrier in twin skin metal roofing systems. They are dual purpose; a robust and effective means of providing:

- An air seal at lap joints in roof and wall liners to improve the air-tightness of the building fabric.
- A moisture barrier to provide an effective method of reducing the level of interstitial condensation which can otherwise occur between the metal roof liner and insulation layer in built up roof systems.

The effectiveness of film backed butyl sealants applied over lap joints in metal liner panels has been verified by independent testing by BRE.

The specification and use of dual purpose film backed butyl sealants will ultimately contribute to avoiding the costly and time consuming remedial works which can result if a building fails an air leakage test.

Correct sealing of liners is essential for achieving an optimum air-tight seal as well as a good vapour check, thus ensuring compliance with Building Regulations Approved Document L2. In response to the mandatory requirements Brett Martin Daylight Systems offer the correct sealant for every roofing and cladding project.

Film backed butyl sealants can be used as recommended in the MCRMA Technical Paper No 14 “Guidance for the design of metal roofing and cladding to comply with approved document L2” and are recommended for use in NFRC Technical Bulletin 36 “Performance Standards for butyl strip sealants in metal clad buildings.”

PLEASE NOTE: *Revisions to Part L2 of the Building Regulations have put a greater onus on build quality as well as insulation levels. Careful installation of cladding is necessary to meet heat loss and air-tightness requirements.

Features

- Economical and environmentally friendly, film backed butyl sealants create an extremely efficient vapour barrier.
- Aid thermal conservation and reduce air leakage, essential in meeting the latest revisions to Part L of the Building Regulations.
- Dual purpose – air seal and moisture barrier to improve air-tightness and reduce risk of condensation.
- Half the price of traditionally fitted vapour barrier membranes.
- Simply applied over liner panel side and end laps.
- BRE tests show sealing of laps using film backed butyl tapes is the most efficient method of creating a vapour seal.
- Film backed butyl sealants will not split during panel flex or movement.
- Large areas of liner panel can be sealed prior to laying insulation and weather sheet.

### DPM Tape

**Key features**
- Membrane tape.
- Double sided.
- Butyl jointing tape.
- Use for laying a radon barrier.
- Suitable for installing damp proof membrane.
- Low vapour moisture transmission.

**Applications**
- Effective sealing of laps.
- Assists with preventing radon ingress.
- Joining/sealing membranes.

### PPDA Tape

**Key features**
- Membrane tape.
- Double sided.
- Polypropylene.
- High tack.
- General purpose.
- Used with Topdek system.

**Applications**
- To avoid membrane lap ballooning up & creating a bubble effect on the side lap.
- Keeps lap flat and in position while the welding process is carried out.

### Expanding Foam Tape

**Key features**
- Compression tape.
- Open cell polyurethane foam impregnated with a modified acrylic dispersion.
- No plasticizers.
- Added flame retardant fillings.
- Strong self-adhesive.
- High weather & UV resistance.
- Expands within minutes.
- Expands five times the compressed size.
- Good weather resistance when expanded up to twice its compressed size.

**Applications**
- Filling irregular gaps between brickwork and timber/steel.
- Air sealing.

## Tapes

### PVC Foam Tape

**Key features**
- Easy to use closed cell sealing tape.
  - Water, air & dust seal.
  - Acrylic self-adhesive.
  - Available in various densities and sizes.
  - Closed cell.
  - Release liner paper.
  - Easy to use.
  - Good UV resistance.
  - Indoor & outdoor use.
  - Resistant to corrosion.

**Applications**
- Cushioning.
- Gap filling.
- Anti-slip mounting.
- Barrier for preventing electrolytic corrosion.
- Compression water seal.

**Colour** | Black, Grey, White  
**Size** | Consult Brett Martin  
**Pack quantity** | 1 Roll  
**Product Code** | RS-PVC

### PE Foam Tape

**Key features**
- Polyethylene adhesive foam tape.
  - Single-sided adhesive.
  - Superceded by B27 EPDM tape.

**Applications**
- Air sealing.
- Cold bridging.

**Colour** | Black  
**Size** | Consult Brett Martin  
**Pack quantity** | Consult Brett Martin  
**Product Code** | RS-PEF

### EPDM Tape

**Key features**
- EPDM foam tape with high quality adhesive.
  - EPDM foam tape.
  - High quality scrim with adhesive.
  - Available in many sizes.
  - Closed cell.

**Applications**
- Air sealing.
- Barrier tape.
- Anti-vibration.
- Construction seal.
- Cold bridging.
- Isolating & thermal.

**Colour** | Black  
**Size** | Consult Brett Martin  
**Pack quantity** | 1 Roll  
**Product Code** | RS-EPT
### VHB Tape

**Key features**
- High strength bonding and sealing tapes.
- Durable and hard wearing.
- Resistance to high & low temperatures.
- Seal against environmental conditions.
- Fast application.
- Permanent bonding on flat and curved surfaces.

**Applications**
- Bonding decorative metal & vinyl trims.
- Bonding powder coated metals.
- Mounting panels to aluminium transport frames.
- Sealing skylights.
- Mounting signs.
- Attach stiffeners in air conditioners.
- Bonding to plastic systems.

### Thermalbond

**Key features**
- High strength polyurethane foam spacer for structural glazing and cladding.
- Weather resistant.
- Adhesive to one or two sides.
- Removable polyethylene liner.
- Pressure sensitive acrylic adhesive.
- Semi rigid foam tape.

**Applications**
- Spacer for two and four sided structural glazing systems.
- Thermal break on storm doors & windows.
- Vibration dampening.
- Glazing interior spacer.

### Cow Dorning Panel Fix Tape

**Key features**
- Double-sided tape.
- Used in conjunction with Dow Corning 896 Panel Fix Adhesive.

**Applications**
- Suitable for the most commonly used cladding panels in rain-screen/ventilated façade designs.
- Normally applied as a temporary support during the installation of the cladding panels on site.

**Colour** | Black  
**Size** | 12mm x 3.2mm x 25m  
**Pack quantity** | 20 Rolls  
**Product Code** | RS-SPE-1-0012B

---

### PU Tape

**Key features**
- Pressure sensitive acrylic adhesive.
- Single coated.

**Applications**
- Protect painted surfaces against abrasion.
- Ideal for door contact areas.
- Ideal for boot seal contact areas.

**Colour** | Grey

### Backer Rod

**Key features**
- Joint foam rod.
- Joint backing foam.
- Closed cell.
- Flexible polyethylene cord.
- Cost effective.
- Chemically & physically neutral.
- Non-absorbent.
- Acoustic properties.
- Reel not included.

**Applications**
- Minimizes the amount of sealant/mastic being used.
- Can be incorporated into side insulation.
- Used with expansion joints.
- Prevent heat loss.
- Acoustic.

**Colour** | Grey/White  
**Size** | Consult Brett Martin

## Checklist

**Selecting the right tape**

<table>
<thead>
<tr>
<th>Question</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. What substrates would the tape be used on? If metal, please advise if powder coated.</td>
<td></td>
</tr>
<tr>
<td>2. Is the tape for internal or external use?</td>
<td></td>
</tr>
<tr>
<td>3. Will the tape need weather protection?</td>
<td></td>
</tr>
<tr>
<td>4. What application is the tape being used for? Sealing, bonding, attaching, etc…</td>
<td></td>
</tr>
<tr>
<td>5. Will the tape be visible or covered?</td>
<td></td>
</tr>
<tr>
<td>6. What load does it need to hold?</td>
<td></td>
</tr>
<tr>
<td>7. Do you need single or double sided adhesion on the tape?</td>
<td></td>
</tr>
<tr>
<td>8. What is your quantity?</td>
<td></td>
</tr>
</tbody>
</table>

We recommend speaking with our experts about any tape that requires a high bond to ensure the correct item is selected.
Sealants

Brett Martin’s carefully selected range of sealants are ideal for your everyday tasks and specialised project work. With the world’s leading brands to choose from, you will easily find the right solution.

Types of Sealant

- Silicone Sealant
- Fire Rated Sealant
- Food/sanitary Sealant
- EPDM Sealant
- Lead Sealant
- Plasto-Elastic Sealant
- Specialist Sealant
- Butyl Sealant
- Plastic Sealant
- PU Sealant
- Hybrid Polymer Sealants & Adhesive
- Adhesive
- Foam
- Ancillary Product

www.roof-sealants.com
### Silfix U9

**Key features**
- Premium high modulus, neutral cure sealant with rubber.
- Premium grade low modulus.
- Neutral cure.
- Primerless adhesion to most surfaces.
- Conforms to BS 5889 & ISO 11600 G 25 LM.
- Excellent sealing on glass, PVCu and brickwork.
- Very good adhesion to many surfaces - polycarbonate, glass, stone, timber and coated metals.

**Applications**
- Primerless adhesion to most surfaces.
- Conforms to BS 5889 & ISO 11600 G 25 LM so can be used with glazing.
- Good sealing on glass, PVCu and brickwork.
- Very good adhesion to many surfaces - polycarbonate, glass, stone, timber and coated metals.

**Colour** | Consult Brett Martin (many colours)
--- | ---
**Size** | 310ml
**Pack quantity** | 25 Tubes
**Product Code** | RS-SLS-2-0310

### Silirub 2

**Key features**
- High quality neutral, elastic one component joint sealant based on silicones.
- Premium grade low modulus.
- Neutral cure.
- 100% silicone.
- Virtually odourless.
- Primerless adhesion to most surfaces.
- Conforms to BS 5889 & ISO 11600 G 25 LM.
- Extensive colour range.
- Excellent sealing on glass, PVCu and brickwork.
- Very good adhesion to many surfaces - polycarbonate, glass, stone, timber and coated metals.

**Applications**
- Perimeter sealing of windows and frames.
- Sealing roofline & drainage systems.
- Weather sealing of aluminium glazing systems, façade and curtain walling.
- HVAC ducting.
- Coated metals.

**Colour** | Consult Brett Martin (many colours)
--- | ---
**Size** | 300ml
**Pack quantity** | 24 Tubes
**Product Code** | RS-SLS-3-0300

### Silirub Colour

**Key features**
- High quality, neutral cure elastical one component joint sealant based on silicones. Allows colour matched sealing based on the RAL System colours.
- Very easy application.
- Permanent colour, UV-resistant.
- Stays elastic after curing.
- Available in all RAL classic system colours.
- Very good adhesion on many materials.
- Low modulus.
- High gloss finish.

**Applications**
- All building and construction joints which require a colour matched sealant.
- All glazing works on powder coated aluminium, PVC, painted wood.
- Top sealing at glazing jobs on powder coated aluminium, PVC, painted wood etc.
- Joints with high movement between different building materials.
- Sealing between painted wood, PVC, powder coated aluminium, etc and brickwork, concrete, etc.

**Colour** | Consult Brett Martin (many colours)
--- | ---
**Size** | 310ml
**Pack quantity** | 15 Tubes
**Product Code** | RS-SLS-1-0310

## Sealants

### Dow Corning 895

**Key features**
- Meets the newly developed European standards for structural glazing application, as developed by EOTA.
- Excellent adhesion to a wide range of substrates including coated, enamelled and reflective glasses, anodised and polyester coated aluminium profiles and stainless steel profiles.
- Odourless and non-corrosive cure system.
- One component product.
- Resistant to ozone and temperature extremes.

**Applications**
- Designed specifically for the structural bonding of glass, metal, and other building components.

### Silirub A

**Key features**
- General purpose internal sealant.
- Acetoxy cure.
- Mould-resistant.
- Primerless adhesion on most materials.
- S1 Fungicide.
- Comprehensive colour range.

**Applications**
- Sealing sanitary-ware in kitchens & bathrooms.
- Perimeter sealing of doors/window frames.
- Perimeter sealing of glass to glass sealing joints.
- Industrial - coated metal, anodized aluminium, stainless steel, general purpose.

### Silirub 2S

**Key features**
- Food safe low modulus.
- Neutral cure.
- Sanitary silicone.
- XS1 fungicide.
- 100% silicone.
- Primerless adhesion to most surfaces.
- Conforms to ISO 11600 F&G 25 LM.

**Applications**
- Sealing sanitary ware.
- Construction & industrial applications where food contact is required.
- Container sealing.
- Cold storage.
- Air conditioning.
- Areas of high humidity (kitchen, bathroom).

## Decorators Caulk

**Key features**
- General purpose acrylic polymer based sealant & filler.
- Solvent free.
- Virtually odourless.
- Easy to use.
- Colourfast.
- Waterproof and paintable after cure.
- Good adhesion with many porous surfaces.

**Applications**
- Sealing window sills, skirting boards, architraves and plasterboard.
- Fills in small cracks.

## Acryrub

**Key features**
- Superior quality acrylic polymer based sealant & filler.
- Solvent free.
- Virtually odourless.
- Easy to use.
- Colourfast.
- Waterproof and paintable after cure.
- Good adhesion to many porous surfaces. Conforms to ISO 11600 F 12.5 P.

**Applications**
- Sealing window sills, skirting boards, architraves, plasterboard etc.
- Fills in small cracks.

## Intumescent Sealant

**Key features**
- Firestop acoustic.
- Tested in accordance with BS EN:1366-4.
- Up to 4 hours protection in joints up to 30mm wide.
- Provides an acoustic seal.
- One part water based acrylic.

**Applications**
- Sealing joints & service penetrations in partitions/fire walls/fire rated door frames/glazing systems.
- Sealing joints in party walls as an acoustic seal.
- Use when airtight and cold smoke seal is required.

## Sealants

### Silirub EPDM

**Key features**
- EPDM compatible sealant & adhesive.
- Neutral cure.
- Fast skinning & cure.
- Thick bodied.
- Highly elastic.
- Conforms to ISO 11600 F&G 25 LM.
- Primerless adhesion on most surfaces.
- Resistance to weather, UV and many chemicals.
- Temperature resistant.

**Applications**
- Sanitary ware.
- Bonding and sealing of EPDM to EPDM and other building surfaces.

**Colour** | Black  
--- | ---  
**Size** | 310ml  
**Pack quantity** | 15 Tubes  
**Product Code** | RS-EPS-1-0310B

### Dow Corning 896

**Key features**
- Immediate bonding strength.
- Excellent adhesion to a wide range of substrates.
- Meet odourless and non-corrosive cure system.
- One component product.
- Resistant to ozone and temperature extremes.
- Used in conjunction with Dow Corning Panel Fix Tape or R41 Cleaner Plus.

**Applications**
- Designed specifically for the bonding of panels.

**Colour** | White  
--- | ---  
**Size** | 310ml  
**Pack quantity** | 12 Tubes  
**Product Code** | RS-SPC-1-0310W

### Soudafalt

**Key features**
- Roof and gutter sealant.
- Bitumen based.
- Excellent adhesion on bituminous substrates.
- Good adhesion on other substrates even under water.
- Slump resistant.

**Applications**
- Repair product for leaks in roof elements including metal sheeting and roofing felts.
- Repairs gutters and sewage pipes.
- Cold adhesive for all types roofing.
- Emergency repair even in wet weather.

**Colour** | Black  
--- | ---  
**Size** | 310ml

## Soudaflex 40FC

**Key features**
- High quality, one component polyurethane sealant with high modulus.
- Immediate bonding strength.
- High modulus polyurethane based sealant & adhesive.
- Stays elastic after cure.
- Good adhesion to many substrates.
- Developed for concrete applications.
- Paintable after cure.
- Weather and chemical resistant.

**Applications**
- Sealing & bonding in manufacturing & construction industries.
- Good structural bond for materials subject to movement & vibration.
- Concrete flooring joints.

## Butyrub

**Key features**
- Permanent plastic one component sealant based on polybutene.
- High quality non setting mastic.
- Polybutylene based elasto-plastic sealant.
- Easy to apply.
- Paintable after 24 hours.
- Good adhesion to most surfaces.
- Weather and chemical resistant.

**Applications**
- Sealing of low movement joints with limited movement of up to 5%.
- Seals joints in masonry, door & window frames.
- Used for mounting single layer glass in frames (greenhouses).
- Seals joints in car bodies, containers & caravans.
- Lap sealant for roofing.

## HS20

**Key features**
- High modulus, one component, moisture curing adhesive and sealant based on Hodgson Hybrid Polymer Technology.
- Premium high tack adhesive & sealant.
- High modulus.
- Moisture curing.
- Excellent adhesion to most surfaces.
- Conforms to ISO 11600.
- Non staining.
- Resistant to ageing & weathering.
- Virtually odourless.
- Bubble-free cure.
- Can last 20+ years depending on conditions.

**Applications**
- Bonding & sealing of PVCu, coated metals, brickwork, polycarbonate, timber & glass.
- Sealing joints where a strong bond & high movement is required.
- Works on sites that want the benefits of a polyurethane but without the harmful solvents & sealants.

| **Soundaseal 240FC** | - No bubble formation in high temperatures or humid applications.  
- Easy to use.  
- Good extrudability even at low temperatures.  
- Colour stability.  
- Weather and UV resistant.  
- Paintable.  
- XS1 fungicide.  
- Conforms to ISO 11600 F 20 HM. | - Structural bonding which needs elasticity and strength.  
- Good in vibrating constructions.  
- Elastic bonding in transport, caravans & containers.  
- Flooring joints in construction. |
| **HS45** | - Neutral cure, high modulus, solvent free, one part, moisture cure adhesive based on Hodgson Hybrid Polymer Technology.  
- Premium high tack high strength adhesive.  
- Neutral cure.  
- High modulus.  
- High initial grab and bond.  
- Unprimed bonding to most surfaces.  
- Fast cure.  
- Weather and UV resistance.  
- 18 month shelf life compared to 9-12 months of other sealants. | - Bonding & sealing internally & externally on most substrates.  
- Bonds and seals decorative frames & skirting boards.  
- Factory or on-site remedial applications. |
| **Fix and Seal** | - Fast curing high tack adhesive sealant.  
- Fast cure.  
- Transparent adhesive sealant.  
- Flexible.  
- Crystal Clear.  
- Tack free in 5 minutes.  
- Solvent and isocyanate free.  
- Excellent adhesion to most substrates. | - Sealing & bonding of glass elements when a transparent bond is required.  
- High tack bonding & sealing. |

## Fix ALL High Tack

**Key features**
- Super tack adhesive.
- High initial tack.
- Fast curing.
- Good extrusion.
- High shear strength after full cure (no primer).
- Stays elastic after curing & very sustainable.
- No odour.
- Can be painted with water based systems.
- Good colour stability, weather and UV resistance.
- Does not contain isocyanates or silicones.
- Good adhesion on wet substrates.

**Applications**
- Sealing and bonding in the building and construction industry.
- Elastic bonding of panels, profiles and other pieces on the most common substrates (wood, MDF, chipboard, etc).
- Elastic structural bonding in car and container industry.

## Fix ALL Crystal

**Key features**
- Crystal clear formulation.
- Excellent adhesion on nearly all surfaces, even if slightly moist.
- Very good mechanical characteristics.
- Good extrudability even at low temperatures.
- Ecological advantages – free of isocyanates, solvents, halogens and acids.
- Can be painted with all water based paints and many other systems (to be tested).
- Permanent elastic after curing.

**Applications**
- All common bonding and sealing applications, both in and outdoor.
- Transparent and elastic bonding in construction and building applications.
- Invisible bonding of glass and other transparent materials in indoor applications.

## Fix ALL Turbo

**Key features**
- Quickly workable and very fast build-up of strength.
- Very high final strength.
- Good extrudability.
- Good adhesion to most common substrates, even on slightly wet substrates.
- Permanent elastic after curing.
- Can be painted with water based systems.
- Good colour stability, weather and UV resistance.

**Applications**
- Bonding in building and metal industry.
- Elastic bonding of objects, panels, profiles and other pieces on the most common substrates.
- Sealing and bonding in the building and construction industry.
### Fix ALL X-treme Power

**Key features**
- Extreme high initial tack of min. 400 kg/m².
- Fast curing and odourless.
- Good workability with included triangular shaped nozzle.
- High shear strength after full cure (no primer).
- Stays elastic after curing and very sustainable.
- Free of isocyanates, solvents, halogens and acids.
- Good colour stability, weather and UV resistance.
- Excellent adhesion on nearly all surfaces, even if slightly moist.

**Applications**
- Bonding in building and metal industry.
- Elastic bonding of objects, panels, profiles and other pieces on the most common substrates.

**Colour** | White  
**Size**   | 290ml  
**Pack quantity** | 12 Tubes  
**Product Code** | RS-HPS-3-0290W

### PU Construct

**Key features**
- Professional quality.
- Cartridge applied.
- Fast curing and strength build-up.
- Filling characteristics, suitable for uneven surfaces.
- Clamping increases the bonding strength.
- Waterproof D4.
- In and outdoor use.
- Solvent free.

**Applications**
- Interior applications with frequent long-term exposure to running or condensed water.
- Exterior applications with exposure to weather influences.
- Manufacturing of door and window-frames that need to meet class D4 according to EN204.
- Bonding of wooden construction elements.
- Bonding of insulation materials (including polystyrene).

**Colour** | Beige  
**Size**   | 310ml  
**Pack quantity** | 15 Cans  
**Product Code** | RS-HPS-3-0290BG

### Soudafoam B3

**Key features**
- Polyurethane B3 expanding foam filler.
- Easy to use.
- Rapid cure.
- Excellent thermal & acoustic insulation properties.
- Expands 30-40 times its initial volume.
- Primerless adhesion on most materials.
- Fire class din 4102 B3, acoustic rating 58Db, insulation factor 32mw/mk.

**Applications**
- Thermal & acoustic insulation around doors and window frames.
- Pipe penetrations.
- Roofing materials & general construction.

**Colour** | Champagne  
**Size**   | 750ml  
**Pack quantity** | 12 Tubes  
**Product Code** | RS-CSF-1-0750CH
### Sealants

#### Pro Foam

**Key features**
- Ideal for filling, sealing and insulation of joints and gaps in a variety of building and construction applications.
- Low post expansion improves accuracy of delivery, reduces foam wastage and minimises cutting time.
- Forms a strong bond to concrete, brickwork, stone, plaster, wood, fibre concrete, metal, PVC and polystyrene.
- Rapid curing formulation: Foam is tack free within 10 minutes, and can be cut or trimmed within 45 minutes.

**Applications**
- Perimeter sealing and fixing of windows and doors.
- Sealing of service penetrations.
- Sealing around insulation panels.

**Colour** | **Green**
---|---
**Size** | **750ml**
**Pack quantity** | **12 Cartridges**
**Product Code** | **RS-CSF-1-0750GR**

#### Soundafoam FR

**Key features**
- FIRE RETARDANT foam.
- Fire retardant up to 360 minutes.
- Efficient seal against smoke/gas.
- Good adhesion to most substrates.
- High bond strength.
- Stable.
- Fully paintable.
- High thermal & acoustic insulation.
- Does not contain CFCs/H-CFCs.

**Applications**
- Fire retardant installation of door/window frames.
- Fire & smoke retardant sealing of partitions between walls/ceilings/floors.
- Filling cavities.
- Filling openings in roof construction.
- Sealing cable/pipe penetrations.
- Improving thermal insulation.

**Colour** | **Pink**
---|---
**Size** | **750ml**
**Pack quantity** | **12 Canisters**
**Product Code** | **RS-FRS-1-0750P**

#### Primer 100

**Key features**
- Liquid.
- Easy application.
- Suitable for all professional sealants on polyurethane.

**Applications**
- Surfaces of expansion joints.
- Joint surfaces of porous materials with high water exposure.

**Colour** | **Clear**
---|---
**Size** | **500ml**
**Pack quantity** | **6 Flasks**
**Product Code** | **RS-ANS-1-0500**
## Sealants

### Primer 150

**Key features**
- Liquid.
- Easy application.
- Suitable for silicones and MS Polymers based sealants and adhesives.

**Applications**
- Surfaces of expansion joints.
- Joint surfaces of porous materials with high water exposure.

<table>

### Primer P

**Key features**
- Promotes adhesion of silicone sealants to masonry, stone, concrete and metal surfaces.
- Film-forming primer resists adhesion degradation due to water immersion.
- Proprietary alkoxy silane resin formulation in solvent.
- Convenient one-part formulation.
- Provides more uniform and stronger bonds.

**Applications**
- Suitable for use on substrates such as natural stone, masonry and glass fiber-reinforced concrete.
- Suitable for metal substrates, such as Kynar® resin painted aluminum.

### Dow Corning R41 Cleaner

**Key features**
- Cleaning solvent.
- Containing special catalyst for adhesion preparation.
- Easy to apply.
- Ready to use.
- Used in conjunction with Dow Corning 896 Panel Fix Adhesive.

**Applications**
- Cleaning and preparation of the most common surfaces such as glass, metal, profiles, plastics and other non porous substrates.

<table>

## PVCu Frame & Glass Cleaner

**Key features**
- Non hazardous.
- Fast acting.
- Non smear formulation.
- Non flammable.
- Environmentally friendly.
- Low VOC.
- Non abrasive.
- Low odour.

**Applications**
- PVCu cleaner.
- Glass cleaner.
- Removal of dirt / grease on most materials.

**Colour** | White  
---|---  
**Size** | 1ltr  
**Pack quantity** | 12 Bottles  
**Product Code** | RS-ANS-1-1000W

## Swipex

**Key features**
- Heavy duty cleaning wipes.
- Removes various types of contaminants.
- Suitable for hands and tools.
- Kind to skin.
- Cleans and removes uncured sealant residue.
- Cleans tools, surfaces, etc. from oil, ink, adhesives, grease, etc.
- Removes oil, sealant and adhesive stains, grease etc. from hands.

**Applications**
- Removal of adhesives, sealants, oils, paints and grease from hands, tools and non porous substrates.

**Colour** | White  
---|---  
**Size** | 290ml  
**Pack quantity** | 12 Tubs  
**Product Code** | RS-ANS-1-0290W

## Silicone Spray

**Key features**
- Lubricates.
- Prevents wear.
- Rust and corrosion-resistant.
- Water repellent.
- Electric insulating.
- For in and outdoor use.
- Aerosol can be used in any angle (360°).

**Applications**
- Sliding doors and rubber seals, rails.
- Electric wiring of cards, engines, lawn mowers, etc.

**Colour** | Clear  
---|---  
**Size** | 400ml  
**Pack quantity** | 6 Cans  
**Product Code** | RS-ANS-1-0400C
## Checklist
Selecting the right sealant

<table>
<thead>
<tr>
<th>Question</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. How much movement does the joint need to accommodate?</td>
<td></td>
</tr>
<tr>
<td>2. What does the joint need to retain or keep out?</td>
<td></td>
</tr>
<tr>
<td>3. What does the sealant need to withstand? Weather, UV, chemicals etc…</td>
<td></td>
</tr>
<tr>
<td>4. Does the sealant need to be fire resistant?</td>
<td></td>
</tr>
<tr>
<td>5. How quickly does it need to perform?</td>
<td></td>
</tr>
<tr>
<td>6. What substrates would the sealant be used on?</td>
<td></td>
</tr>
<tr>
<td>7. Does it require a specific colour?</td>
<td></td>
</tr>
<tr>
<td>8. Does it need resistance to bacteriological attack?</td>
<td></td>
</tr>
<tr>
<td>9. Does it need to be paintable?</td>
<td></td>
</tr>
<tr>
<td>10. Does it need to be compliant with relevant standards?</td>
<td></td>
</tr>
</tbody>
